Master Gardener Program

Garden for Food

will teach people how to grow, produce and preserve their own small fruits and vegetables. There are many reasons to grow your own vegetables, herbs and small fruits.

For Health

If you are looking to be healthier in 2009 and beyond, there is nothing better than eating fresh fruits and vegetables. Nothing provides a better sense of self-sufficiency than stepping out into your backyard or onto your patio to pick fresh veggies that you've grown, to feed your family.

To Save Money

In these uncertain economic times growing your own food will help you save money. Yes, there are costs involved with seeds, soil amendments, watering and garden implements, but all of these costs combined do not add up to buying produce at the local grocery store. WSU Chelan County Master Gardeners will teach you ways to be frugal

with your gardening budget and still reap the rewards of a fantastic harvest.

For the Environment

Eating *green* and eating local is on the rise. If environmental stewardship is your passion, then growing produce in your own backyard will help reduce the environmental cost of mass producing and shipping food. WSU Chelan County Master Gardeners will teach you how to grow food in an environmentally friendly way that conserves and protects water quality. Or, if organic gardening is of interest to you, then we can teach you to be successful using only those methods to care for your garden.

Join us on Saturday,

Feb. 7, 2009

10am—12pm

as we explore this new program.
